What is MocoSpace? MocoSpace is an online mobile community, social network, something like Facebook.

This method is maybe not totally new and some of you already doing something similar on Facebook, but why MocoSpace is better? Because you can create as many accounts as you want, there are no phone verify, no email verify. There is massive spam potential here, you can send instant messages (IM) and also comments on anyone's wall instantly with a link, and if you click 'Find Friends' > 'Find me a Friend', you get a random user. Its like they designed it to make it easy to spam. Most of the users are from the US, so it's really good for high paying US CPA offers. There are ten thousands of users are online at any given time, the most users (60.000-70.000) are online at around 6 pm GMT.

You may ask what is the jump all of a sudden in my earnings at the end of February, i can tell you that: that was the time when i bought the [Ubot Studio](#) and i started to use it along with the MocoSpace Friend Adder (which is not really a friend adder, it is a lot more than that, here you can see a video how it is working in action:

<http://www.developersnippets.com/techvideobytes/video.php?id=150702840>)

Honestly i used to work 2 hours a day with this method manually and i can earn what you can see on my earning proof (~\$50/day) yea..maybe 2 hours seems too much for some of you, but hey, you don't have to do this 2 hours continuously, you can do this whenever you have a little time! And since i'm using the automated way ([Ubot](#)), the working hours are reduced to minutes and my earnings are far more higher, around \$100/day. But you can do it manually as well of course, it's your choice!

### The method:

**Step 1:** Create an account on MocoSpace, a hot chick profile would be the best (as always) 😊, fill out the personal infos after you registered, change the background to be seen more legit. If you want to create more accounts, let's say total 10, you will need 10 different email addresses and 10 different IP addresses/free proxies to do that, why? Because if you always register with the same ip address, MocoSpace easily link all of your accounts together and that's what you don't want at all.

**Step 2:** Choose one freshly created MocoSpace account and log in, once logged in click 'Find Friends' then choose males.

**Step 3:** This is where you can send an IM, so they will get this like it says instant and what happens is a little box pops up on their screen. You don't have to send any friends request, just send IMs, after you did this, you will get the friend requests from them (I clearly remember when i did this first, i got over 150 friends after the first 6 hours, so it's really viral), but you really don't need friends, you can send IMs to anybody who is online and accepts IMs from strangers.

**Step 4:** Enter in your message including the link with your CPA offer in it. You can send IM only to an online person and/or some of them blocking IMs from strangers (the default setting is accepting IMs from everybody). So the most people are accepting IMs. In addition you can send them 'regular messages' if the person is not online when you try to send an IM. They can read it when they will be online next time, it will be in their inbox.

The limit is currently 200 IMs per account per day manually. 60 IMs is the limit using automated methods ([Ubot](#)), don't ask me why this is just my findings so far.

*Note:* Everytime you use a CPA network, this is a good idea to blank/fake the referer, because you don't want to reveal your traffic source (you have two very good reasons to do that: the network doesn't like your traffic and/or there are affiliate managers who often steal campaigns, but if you fake your referer, they can't do it, because they can't see where your traffic is coming from.)

There is a simple tool, which can do the job for you: <http://cloakedlink.com/>, click on 'Cloak Using Double Meta Refresh!' (it's also a good idea to shorten your generated „ugly” link with an url shortener service, like [bit.ly](http://bit.ly))

There are good guides for more experienced users how can you fake the referer by your own especially if you have or want to create a landing page for your CPA offers, <http://www.contentgeneration.org/how-to-fake-a-browser-referrer-for-blackhat-cpa/>, <http://www.contentgeneration.org/cpa-redirector-2/>

Let's going back to create accounts: If you have dynamic IP address, it is good for you, because you don't need proxies to create new accounts, just disconnect-connect your internet connection and you get a new IP address, rinse and repeat this whenever you want to create a new MocoSpace account. But if you have static IP address (like me), you need proxies to create new MocoSpace accounts.

I'm using [Firefox](#) browser with [FoxyProxy](#) addon, you can always find free fresh proxies here: [http://www.ip-adress.com/Proxy\\_Checker/](http://www.ip-adress.com/Proxy_Checker/) and here: <http://elite-proxies.blogspot.com/> and you can check for the working ones with this tool: <http://www.checker.freeproxy.ru/checker/>

After you have a few working proxies, you can configure your Firefox through the FoxyProxy addon to use these proxies, here's a brief guide how you can do that: <http://davidtse916.wordpress.com/2007/07/26/switch-proxy-settings-on-firefox-using-foxyproxy/>

*Tip:* How to select the good CPA offers for MocoSpace?

It's a mobile community, you can always try mobile offers (ringtones, wallpapers) and you really shouldn't have to reinvent the wheel, just select the offers with the highest EPC (like IQ tests, which character are you...) and you'll be fine.

The background of the page is a collage of US dollar bills and coins, including a large one-dollar bill on the left and various denominations of bills (one, five, ten, and twenty) scattered across the right and top. The image is faded and serves as a decorative backdrop.

And that's all, you are ready to make some moneyz! 😊  
I hope you like this method and you have learnt something new from this ebook.
